

Iteration 2 Status Report

Goals:

1. Add Intermediate layer between Django and React to integrate them
2. Complete login page
3. Complete the candidate and recommender account pages.
4. Submit iteration 2 status report.

Frontend:

- Completed routing all pages (login, signup, faq, templates, etc)
- Completed basic page outlines for login, signup, and user pages
- Researched integration methods for React and Django

Backend:

- Added Intermediate layer (REST framework) between Django and React to integrate them in Sprint 3
- Defined abstract User class to integrate with Django authentication module
- Created serializers and parsers for data models to send data to and receive data from the frontend
- Wrote API for frontend use

Some goals were not in Sprint 2, so they are pushed to Sprint 3.

Next Sprint's Goals:

1. Complete design and implementation of user recommendation list
2. Begin React and Django integrations, including user authentication and login
3. Complete the database and file server.
4. Interface demo/testing
