Iteration Status 1 Report

Goals:
1. Review tutorials on React and Django frameworks as well as other necessary modules.
2. Create skeletons for Django and React
3. Design and implement a demo of the interface.
4. Completion of login page.

Frontend:
- Created skeleton React frontend directory
- Completed home page of site
- Completed navigation / header component to be used on all pages
- Reviewed tutorials for React and React / Django integration

Backend:
- Created a skeleton Django project
- Set up SQL integration
- Defined SQL model schema

Not all goals were met. For example, the login page and the interface demo are not ready. We will be pushing this to Sprint 2.

Next Sprint's Goals:
1. Add Intermediate layer between Django and React to integrate them
2. Complete login page
3. Design and implement interface demo
4. Complete the database and file server.
5. Complete the candidate and recommender account pages.
6. Submit iteration 2 status report.
